

KAZI FIROZ ASIF

FULL-STACK ENGINEER / PRODUCT-FOCUSED DEVELOPER

Mymensingh, Bangladesh | kazifiraz7@gmail.com | WhatsApp: +880 1772-012777

[Portfolio](#) | [LinkedIn](#) | [Fiverr Profile](#)

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer and Level 2 Fiverr Seller with an exceptional track record of designing, building, and deploying high-impact Micro-SaaS products from scratch. Expert in optimizing software architecture to achieve near-zero operating and API costs while maintaining production-grade scale. Highly skilled in full-stack development using PHP, JavaScript, and Tailwind CSS. Proven ability to translate complex business objectives into scalable software, backed by strong cross-border client management and academic communication skills in English.

CORE TECHNICAL SKILLS

Languages & Frameworks: PHP (Vanilla/Custom Architecture), JavaScript (ES6+), HTML5, CSS3, SQL

Frontend & UI/UX: Tailwind CSS, Responsive Web Design, Component Optimization, Remixicons

Architecture & Cloud: High-Throughput API Integration, Big Data Querying, Google CSE API, Linux Shared/VPS Hosting, Git/GitHub

Core Competencies: Micro-SaaS Lifecycle, Deep API Integration, Outlier Detection Algorithms, Cybersecurity Tooling, Technical Communication

HIGH-IMPACT PROJECTS

Project Zero-Trace — Cybersecurity OSINT & Breach Scanner

- Engineered a high-performance OSINT cybersecurity platform that integrates advanced threat-intelligence APIs to query billions of historical breach records instantly.
- Optimized API request-handling middleware and fast JSON response-parsing logic to render compromised asset data with near-zero latency.
- Successfully developed and published a companion Android mobile application to expand cross-platform product reach.
- Received widespread public validation and visibility, resulting in a feature by a prominent national newspaper.

ViralVault PRO — AI-Driven Trend Analytics Platform

- Designed and launched an AI-powered discovery platform that detects early-stage viral content and emerging macro-trends on YouTube.
- Programmed a proprietary outlier detection algorithm to monitor and process standard video velocity, bypassing traditional high-cost data subscriptions.
- Integrated automated SEO analysis modules to dynamically generate target metadata structures for marketing optimization.

ZorexEye — AI-Assisted Intent-Driven Search Engine

- Architected a custom search ecosystem leveraging the Google CSE API, engineered specifically to index, filter, and isolate high-relevance digital assets.
- Implemented a highly efficient serverless-inspired runtime architecture, successfully limiting ongoing infrastructure costs to near-zero.
- Built an intuitive, lightning-fast web interface using native JavaScript and Tailwind CSS to ensure optimized Core Web Vitals.

CreatorAI — Lean-Infrastructure Content Generation Ecosystem

- Developed a comprehensive AI content creation suite featuring advanced natural language and asset generation capabilities.
- Engineered a proprietary, intelligent API request-routing logic that dynamically leverages free-tier infrastructures to completely eliminate recurring API token expenses.

PROFESSIONAL EXPERIENCE

Fiverr — Full-Stack Web Developer (Level 2 Contractor)

2021 – Present

- Maintained a consistent 5.0-star client satisfaction rating over multiple years by engineering tailor-made software systems and micro-products for international business owners.
- Designed clean, highly responsive user experiences and lightweight web apps, writing maintainable object-oriented or procedural PHP backends and interactive vanilla JavaScript.
- Oversaw complete product deployment lifecycles, specializing in converting wireframes into live products deployed on optimized production servers.

EDUCATION

National University, Bangladesh

Bachelor of Arts (B.A. Hons) in English Literature | Graduation Year: 2026
